

BARIATRIC SOLUTIONS—B-Series

LiftCare

innovative healthcare solutions

Barton's® **Bariatric Solutions** include a bed convertible chair, and the Positioning and Transfer System (**PTS™**). They provide a safe, no-lift solution for the increasing number of non-and limited-ambulatory Bariatric patients weighing up to 455kgs.

The Barton **TransBed™** includes unique features such as the swing-away trapeze and “Helping Hand” side-egress bar and integrates with the existing **I-Series Convertible™** chair range and Barton® **PTS™** to allow a single caregiver to move patients up to 455kgs safely, carefully and efficiently.

Bariatric Solutions—B-Series

Barton's Bariatric Solutions address the increased risk of physical injury to both caregiver and patient when caring for bariatric patients. The Barton B-1000 TransBed™ with Positioning and Transfer System (PTS™), and I-Series Convertible Chairs allow a single caregiver to transfer non- or limited-ambulatory bariatric patient weighing up to 455kgs safely, easily and efficiently.

Barton B-1000 TransBed™

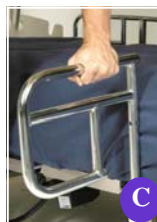

- The **B-1000 TransBed™** 5-function bed can accommodate up to 455kgs.
- **Expandable width** (991 to 1312mm) and **length** (2154-2285mm)
- **Swing-away trapeze** allows patients to re-position themselves, yet swings away to eliminate sense of confinement
- **“Helping Hand”™ side-egress bars** allow patients to help themselves into and out of bed, promoting general sense of independence.
- **Solid Polypropylene headboard & footboard** designed for strength and easy integration with the Barton PTS™
- **Built-in digital scale** (optional) allows easy patient weight measurement without moving patient out of bed.
- **5-function linear actuators** operate smoothly and quietly, adjusting to a variety of positions, including Trendelenburg position.

The B-1000 TransBed™ is a 5-function linear actuator-driven bariatric bed which allows a variety of patient bending movement at the waist and knees, as well as tilting forward and backward in either the upright or prone positions.

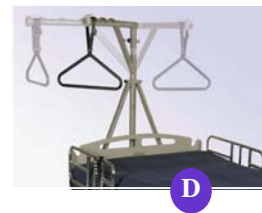

The TransBed™ allows patients to be easily positioned in the Trendelenburg or reverse Trendelenburg positions.

- A. Integrated digital scale for no-stress weight measurement
- B. Solid Polypropylene headboard and footboard has easy-grip holds, and includes built-in PTS™ holder

C. “Helping Hand”™ side egress bar for patient safety and convenience

D. Swing-away overhead trapeze can be put to side when not in use.
